INDEX

VOLUME XXXI, 1964

Subjects and Titles

Abstract: 63

Ankylosis of Primary Teeth: 120

Annual Business Meeting, American Society of Dentistry for Children, Minutes: 171

Annual Meeting A.S.D.C., 1964 Program: 239

Behavior Management in Dentistry for Children: 295

Book Review: Dentistry for Children: 262

Calcification of Mandibular Second Primary Molars in Relation to Age: 284

Case History—Treatment of a Child With Rampant Caries: 323

Case Reports: Rehabilitation of a Fractured Incisor Using the Patient's Natural Crown: 19, 263; Replantation of an Avulsed Permanent Central Incisor: 103

Changes in the By-Laws of the A.S.D.C., Notice: 150, 236

Clinical Evaluation of Local Gingival Recession in Children, A: 257

Comparative Study of Systemic Sodium Fluoride and Topical Stannous Fluoride Applications in Preventive Dentistry, A: 314

Comparison of Motivation Achieved by Two Different Technics Employed in a School Dental Health Program: 327

Consecutive Six-Year Study of the Prevalence of Congenitally Missing Teeth in Private Pedodontic Practice of Two Geographically Separated Areas: 264

Dental Caries, Retained Primary Tooth Fragments and the Eruption of Permanent Teeth: 139

Dental Findings in 2 Year Old Survivors of Prematurity With 2 Different Neonatal Antibacterial Drugs: 342

Dentistry for Children Faces the Future: 179

Disclosing Solutions for Pedodontics: 131

Discoloration of the Teeth in Patients With Cystic Fibrosis of the Pancreas: 347

Editorial: 301

Effect of Oligodontia on Facial Growth, The: 335

Effect on Dental Caries of a Change From a Naturally Fluoridated to a Fluoride-Free Communal Water, The: 151

Effective Procedure to Help Guide the Developing Dentition Into Proper Occlusion, An: 192

Effective Treatment for Pain in the Eruption of Primary and Permanent Teeth, An: 289

Evaluation of the Dental Profile of Neuromuscular Deficit Patients: A Pilot Study, An: 204

Factors of Occlusion as They Affect Space Maintenance: 302

Fetal Morphogenesis of the Human Dentition: 67

Gingival Tissue Reaction to Topical Application of Stannous Fluoride for the General Anesthesia Patient: 100

How a Base Affects Fracture Resistance of Amalgam: 187

How the Dentist's Behavior Can Influence the Child's Behavior: 358

Implications and Interrelations of Oral Habits: 164

Improving Oral Hygiene in Handicapped Children by the Use of an Electric Tooth Brush: 198

Index to Volume XXXI: 367

Indirect Space Maintainer, An: 127

Induced Xerostomia and Its Relation to Dental Caries: 160

Lymphosarcoma in the Mixed Dentition: 232

Management of Patients With Deleterious Habits: 274

Management of Sensitive Children in a General Dental Practice: 146

Merit Award Committee Announcement: 98

Mixed Dentition Analysis: A Predictor of

Tooth Size and Arch Length Relationship, The: 114

Natural (Indirect) Pulp Capping: 107

New Concept in Extra and Intra-Oral Radiographs, A: 34

Officers and Committees of the American Society of Dentistry for Children, 1963-64: 40, 158, 240

Permeability of Active and Arrested Carious Lesions to Dyes and Radioactive Isotopes: 26

Polaroid Camera as a Pedodontic Aid, The: 3

President's Message: 2, 66, 178, 243, 294

Public Relations Committee Report: 163

Recognition of Periodontal Disease in Children: 7

Rehabilitation of a Fractured Incisor Using the Patient's Natural Crown—Case Report: 19

Replantation of an Avulsed Permanent Central Incisor—Case Report: 103

San Francisco Meeting, Ted Levitas Reports: 349

Simple Technique for Correcting an Ectopically Erupting Maxillary First Permanent Molar, A: 16

Simplified Intra-Oral Mandibular Splint, A: 228

Study of Ionizing Radiation Encountered in Dental Offices, A: 352

Thyroid Activity and Dental Caries in Children: 271

Treatment of a Child With Rampant Caries —A Case History: 323

Tumor and Tumor-Like Lesions of the Oral Cavity in Infants and Children: 42

Understanding and Use of Space Maintenance Procedures: 22

Unit News: Second, Third and Fourth Quarters: i
